

Werkstudent position for laboratory technician

We are looking for a dexterous laboratory technician with background in Biology/Biochemistry to work in our founded start-up.

We are EpiQMAx, a GmbH in the Biotechnology Business Area. EpiQMAx offers a service to pharmaceutical companies and research institutes for the measurement of epigenetic modifications on histones and for general protein analysis using mass spectrometry. Our mission is to foster the realization of epigenetic tests to the clinics and help research laboratories on the decoding of epigenetic mechanisms.

The selected candidate will have the opportunity to learn the operation of mass spectrometers, and eventually become our head laboratory manager.

The ideal candidate shall have/perform the following

- Requirements/skills: Bachelor degree in Biology/Biochemistry or related.
- Duties: process samples from our clients. Keep sample and reagents inventory documented and updated. Maintenance of small laboratory machines.
